

Manitou the latest to approve the SG Revolution tyre range

Further good news for ITWS, the specialist supplier of SG Revolution super cushion solid tyres in the UK and Europe, has come in the form of approval from Manitou in France to factory fit tyres to the company's range of telescopic materials handling machines.

The French manufacturer follows in the footsteps of a number of OEM's who have sanctioned the direct fitment of SG Revolution tyres on the production line.

Having completed all suitability tests Manitou rapidly agreed to take on board the offer from ITWS to supply direct to the factory in France; the machines are now rolling off the production line complete with SG Revolution tyres fitted with tread patterns to suit whatever the machines application of work
