

Service Exchange makes life easy for solid tyres users

A new tyre and rim exchange scheme has been launched by ITWS Ltd for users of their popular ranges of SG Revolution super cushion solid tyres.

Designed to save users the time and hassle of changing tyres, the new scheme – Service Exchange – enables the efficient swapping of worn SG Revolution tyres with rims for a brand new set of tyres and exchange rims. What’s more, the swap can be achieved in around an hour by a trained ITWS fitter ensuring that the machine is back up and running in no time.

One customer to take advantage of the new scheme is Michael Jackson, Site Manager of the Ilkeston depot of Ward Recycling; a Derbyshire based scrap metal business. He is adamant that the scheme has already saved the company time and money in productivity gains. The previous method of changing tyres could lose the company a day in productivity whilst the tyres were being changed.

Working with ITWS, replacement tyres are ordered one day, pre-fitted to the exchange rims and swapped the next in under an hour. Job done. The service is highly valued by Michael;

“We could lose up to a day waiting for tyres to be fitted before we agreed to trial the Service Exchange scheme. My depot is now shifting more metal thanks to both the SG Revolution tyres – which solved my initial tyre puncture and damage problems – and the exchange scheme which allows the super efficient swapping of tyres and rims. I wouldn’t be without it”.

For more information on the scheme please call International Tyre and Wheel Solutions on 01942 677618, visit the website www.tyreandwheelsolutions.com or email info@tyre@wheelsolutions.com
