The Newsletter from ITWS
Waste and scrap industry tyre specialists

Our integrated warehouse and offices are now open!

This is our second move in 2 years, but we're happy to say that with all our operations now under one roof we won't be moving again any time soon!

We're still very local to the original roots of the business in Leigh, Warrington but instead of separate offices and warehouse our new unit is a single integrated unit which also offers us the space we require for future growth.

As a consequence we can stock a wider range of tyres improving lead times for all customers and we can visibly monitor stock movements from our offices.

We're looking forward to welcoming visitors to our new home at:

Unit E9, Aspul Court, Moss Industrial Estate, Leigh
Lancashire WN7 3PT

Welcome!

We've had a busy time of it lately. The RWM show at the NEC in September was swiftly followed by our move in to brand new premises and we've also been working on new tyre designs for major OEM customers.

It is pleasing that sales have continued to increase and our presence in Europe is going from strength to strength. We're looking forward to an equally busy 2013.

Les Williams

RWM Show

We saw many of you on our stand during the RWM Exhibition at the NEC during September. Thank you for taking the time to drop by.

We had a bigger display than ever including a range of new tyres and wheels -including a set of 110-20 C28X super cushion solid tyres that we purpose designed for JCB's new 527-58 Wastemaster Loadall. These were also previewed on the machine on JCB's stand.

Our other new products included a range of port compound tyres and new rims for the unique ITWS Service Exchange Scheme.

We're approved by Komatsu

Our tyres are now being delivered directly to the Komatsu assembly line in Germany for factory fitment to new machines. This follows a year long process of working with Komatsu to gain approval. From supplying exhaustive data to rigorous testing of the tyres we're pleased to have met their strict criteria and standards.

The ITWS team is growing

The business is growing and with it the team here at ITWS. Our latest full time appointment is Matt Attenborow who has joined us as Assistant Manager and Warehouse Manager. With an excellent grounding in the freight and warehouse sector Matt is already making a difference to our stocking and despatch processes and is overseeing all our warehouse activities. We're delighted to welcome him to the team.

We've also appointed a Health & Safety Advisor who has over 30 years of experience in the H&S arena. Colin Marshall will be working in conjunction with us here at ITWS to oversee our rigorous adoption of all H&S practices in our factory and office environment.

Matt Attenborow

Colin Marshall

We pride ourselves on safe working practices for employees, suppliers and visitors alike and we aim to keep on top of all legislation relevant to our environment.
