

## Puncture free operation every shift

SG Revolution tyres provide the perfect solution for wheeled excavators working in waste, demolition and recycling applications where there is a high chance of tyre damage and punctures. The unique design and manufacture of SG Revolutions will ensure downtime is a thing of the past by eliminating flats, punctures and repairs. What's more they provide excellent traction in harsh environments and will also return more serviceable tread life than standard tyres or tyres with fill.

Distributed exclusively in Europe by ITWS the tyres are easy to install and there is a wide choice to fit all makes and sizes of machine.

## Smooth operation thanks to rubber spacers

ITWS helped to pioneer a solution for a rubber spacer to work effectively with SG Revolution tyres for wheeled excavators. Working in conjunction with an engineering partner we helped to design and develop the spacer to eliminate rubble, obstacles and general dirt from clogging the machines tyres. Tested with customers in a variety of applications before release, the spacer design is working successfully.

## Lower operating costs, increase your productivity

When you invest in SG Revolution tyres you can rest assured that your machine will spend more time doing the jobs it's meant to do. No expensive tyre replacements and no interruptions to your business due to tyre repairs will help your operating costs decrease and your work rate increase. Totally wear resistant SG Revolution tyres are designed to resist cuts and tears from obstructions, whilst the tough rubber compound is designed for durability and long life.

## Service Exchange

Our innovative Service Exchange programme – unique to ITWS – has been designed to make life easier on site when it comes to replacing tyres. Simply call us and we will come on site to swap your old tyres and rims for a set of new tyres and our exchange rims – which will have been refurbished to the highest standards. We'll be gone in a couple of hours meaning your machine can get back to doing what it does best.

## Special offers from the experts in super cushion tyre technology

Please call us for details of our amazing offers on SG Revolution skid steer tyres. It could be the best call you make!
